14 - What specific advice would you give to improve student learning in the course?

Response Rate	4/23 (17.39%)
---------------	---------------

- Be prepared before the class even starts because the class is extremely difficult
- stop making a class like this asynchronous
- He is doing well as a professor, and I recommend that he continues to work along side with the students for their success.
- To keep having zoom meetings for students that might struggle, they are really helpful
